Unfortunately, many barriers to HIV testing remain. Stigma and discrimination still deters people from taking an HIV test. Access to confidential HIV testing is still an issue of concern. Many people still only get tested after becoming ill and symptomatic. The good news is that there are many new ways of expanding access to HIV testing. Self-testing, community-based testing and multi disease testing are all helping people to know their HIV status. The students from various schools gave cultural program and mime on the theme
